OVERVIEW

Kacey is the Assistant Director of the Workers' Compensation Department, where he assists in the oversight of 35 attorneys in 10 offices. He also serves as the managing attorney of the Workers' Compensation Department in the Harrisburg office.

In addition to his various management responsibilities, Kacey focuses his practice on high-exposure and complex workers' compensation litigation, representing clients in the construction, oil and gas, grocery, hospitality, landscaping, transportation and poultry industries. Kacey also consults with workers' compensation carriers to provide advice and guidance on pre-litigated workers' compensation cases. He is also a frequent presenter on topics relating to workers' compensation for carriers and employers.

A graduate of Washington & Jefferson College, Kacey received a B.A. in Political Science and Business Administration. He subsequently received his *juris doctor* from Widener University School of Law.

RESULTS

Secured a decision denying a claimant wage loss benefits for an accepted work injury

Workers' Compensation

October 10, 2024

We secured a decision denying a claimant wage loss benefits for an accepted work injury. The claimant sustained a left wrist contusion and extensor carpi ulnaris (ECU) peri-tendonitis injury when a 50-pound lid crushed his left arm in the course and scope of his employment. The claimant alleged that as a result of the injury, he was unable to perform light-duty work as a system operator. Through medical evidence, we were able to establish that the claimant had medical issues unrelated to the accepted work injury that were the cause of his inability to work.

Decision Secured Denying Wage Loss Benefits for an Accepted Work Injury

Workers' Compensation

September 26, 2024

We secured a decision denying the claimant wage loss benefits for an accepted work injury. The claimant sustained a left wrist contusion and extensor carpi ulnaris peri-tendonitis injury when a 50-pound lid crushed his left arm in the course and scope of his employment. The claimant alleged that, as a result of the injury, he was unable to perform light-duty work as a system operator. Through medical evidence, we were able to establish that the claimant had non-work-related medical issues unrelated to the accepted work injury that caused him to be out of work.

More Than \$30,000 Recovered for Employer in Workers' Compensation Case

Workers' Compensation

September 25, 2023

We prevailed on termination, suspension and review petitions, where the workers' compensation judge found that the claimant was fully recovered as of the date of our medical expert's examination. The judge found our witnesses more credible than the claimant's and denied the claimant's review petition to expand the accepted injury. We successfully recovered \$33,508 from the Supersedeas Fund for our client.

Successfully Prosecuted Termination Petition on Behalf of a Multinational Manufacturing Corporation.

Workers' Compensation

March 15, 2023

We presented medical evidence, including a record review of all diagnostic study films and medical records from a Board-certified physiatrist, to establish that the claimant's physiological complaints were unrelated to a work injury. The judge accepted our evidence as fully competent, persuasive and credible, and, as a result, terminated the claimant's benefits.

Successful defense of claim petition in case involving forklift accident.

Workers' Compensation

November 10, 2022

The claimant was hit by a forklift while operating a forklift, and alleged the accident caused a back injury. Through employer witness testimony and medical testimony, we showed that the claimant did not sustain a back injury, and that her medical issues were pre-existing and unrelated to the accident. The judge found that the evidentiary evidence presented by the employer established that, even though the claimant was involved in a forklift incident, the claimant did not sustain a work injury, and her ongoing medical issues are unrelated to the forklift accident.
